

PerfectFit Shutter Lite FAQ's

- **What will the lead time be?**
Standard lead times of 5 days plus next van run, this is subject to change during peak period.
- **Where is the product manufactured?**
The product is manufactured at Hunter Douglas UK production facility in Coventry.
- **Can you have tier on tier?**
No, PerfectFit Shutters are a fixed panel and are not hinged like a standard shutter.
- **Can you have shaped PerfectFit Shutters?**
No, they can only be manufactured to fit into square or rectangular windows.
- **Can you have a hidden tilt?**
No, PerfectFit Shutters come with a tilt bar either on the left or right-hand side of the panel.
- **Can you have a divider rail?**
Yes, midrails are automatically included on drops exceeding 160cm, however, they are not available as an optional addition.
- **How many colour options are available?**
There are two colour options available, Arctic White and Cotton White. You cannot have custom colour.
- **Can you have a handle cut out?**
Yes, you can have a handle cut-out, please refer to the measuring guide. You must have a handle cut out at least 14cm above or along the glass edge.
- **Can you fit PerfectFit Shutters on a door window?**
Yes, you can have a handle cut-out, please refer to the measuring guide. You must have a handle cut out at least 14cm above or along the glass edge.
- **What are PerfectFit Shutters made from?**
The product is made from PVC - Polysilk Vinyl.
- **Are PerfectFit Shutters suitable for bathrooms?**
Yes, because of the material it is made from, they are great in bathrooms and high humidity areas in the home.
- **Can PerfectFit Shutters be motorised?**
Unfortunately, no, this isn't an option.
- **If there is a fault, what should I do?**

PerfectFit Shutter Lite FAQ's

- **Will I get a sample?**

Yes, a sample panel and brackets are available. Please speak to your Rep for more information.

- **Are Louvers matched from one panel to the other?**

Louvre positions may vary when one panel is smaller than another. For instance, opening windows are frequently smaller than fixed panes, resulting in uneven louvre alignment.

- **Is it possible to open the shutter to access the glass?**

PerfectFit Shutters are designed with a fixed mounting position and do not feature a hinge mechanism, cleaning the window would necessitate its removal.

- **Are brackets colour coordinated to the shutter?**

No, brackets are only available in a standard white, but they are only partially visible from inside the room.

- **Does installing the PerfectFit Shutter cause condensation, as sometime see with other PerfectFit products?**

Condensation typically arises from inadequate home ventilation. Therefore, if humidity levels are high, there's a potential for condensation build-up.
